**(\*note: Due to small numbers (n=1-4), exact count not provided; )**

*Limitations of small numbers:  
Cells in some tables in this publication, and particularly those tables specific to individual cities and towns, contain small numbers. Rates and proportions based on fewer than five observations are suppressed, and trends based upon small numbers should be interpreted cautiously.*

Note: State teen birth rates were calculated using 2008 population data; however, please note that 2008 community teen birth rates use 2005 population estimates.
